PREFACE

Sperm Token is a fully decentralized, peer-to-peer digital currency, owned in whole and governed by its community with instant rewards for holders.

Our token is a hybrid between NFT-meme and charity token, community oriented, and NFT deflationary token.

According to statistics, about 1 man in 8 will be diagnosed with prostate cancer during his lifetime, therefore Sperm Token inspires to be more than your regular meme NFT token, and to deliver something special to our community in making regular charity contributions to prostate cancer charities and research centers, and that is to serve the purpose of protecting our sperms for everlasting life.

It will definitely be a powerful and impactful token, as it comes with great features, as one of the most exciting aspects is the redistribution mechanism that rewards 4% of every single buy or sell directly to existing holders, so when you hold \$SPERM, your allocation will increase automatically.

\$SPERM will be fairly launched, and we will make sure to prevent sniping bots to be able to make a transaction before anyone else.

TOKENOMICS

Sperm Token is a peer-to-peer cryptocurrency with built-in automated rewards farming protocol.

It employs 4 simple functions which are reflection, liquidity acquisition, burn, and charitable donations in each trade and transaction.

Each transaction is taxed a 10% fee, which is split 3 ways which are 4% to be redistributed to all existing holders, 4% goes to the locked liquidity pool, and last 2% to the marketing wallet.

Just HDOL \$SPERM in your wallet, and watch your balance grow as our community grows.

With 4% transaction fee on every buy or sell, our holders will receive passive rewards just by holding.
